## The CleanRest® Commitment

Cleanliness | Comfort | Protection

## Why do you need to install a CleanRest® mattress encasement?

CleanRest® encasements protect you and your family from harmful allergens, microtoxins, dust mites, and bed bugs and their fecal matter that build up over time in any mattress, box spring, and pillow. CleanRest® is the world's most trusted and technically advanced sleep and bedding protection product line, featuring patented MicronOne® fabric technology. Each CleanRest® product line comes with different attributes, features, and benefits at different price points to suit your needs and budget.

Review the chart below to determine which CleanRest® product is best suited to your needs.

Product Features	CleanRest® Premium	CleanRest® Pro	CleanRest® Simple

Fully Zippered Encasement	Yes	Yes	Yes
Zip-N-Click™ Closure	Yes	Yes	Yes
Washability	Maximum durability. Machine-washable in hot water. Do not use bleach. Tumble-dry on normal heat setting. Do not iron.	Maximum durability. Machine-washable in warm water. Do not use bleach. Tumble-dry on normal heat setting. Do not iron.	Limited durability. Can withstand limited washing in warm water. Do not use bleach. Tumble-dry on low heat setting. Do not iron.
Construction	Superstretch sidewall fabric fits mattresses up to 21" deep.	Superstretch sidewall fabric fits mattresses up to 21" deep.	Sidewall fabric fits mattresses up to 12" deep. Limited to no stretch sidewall.

MICRONONE®

## What is MicronOne®?

MicronOne® is our patented fabric technology used in the manufacture of CleanRest® products. MicronOne® technology focuses on the microscopic fabric pore size, which stops allergens, microtoxins, dust mites, and bed bugs from passing through from your mattress, box spring, and pillow, thereby protecting you and your family's skin and respiratory system.

chemical-free

CleanRest® products are Phthalate- and Bisphenol A-free. No volatile organic compounds are used in our products.

The **NEW patent-pending Zip-N-Click™** zipper closure locking mechanism available on CleanRest® brand encasements provides you and your family with added security by ensuring that bed bugs cannot enter and/or escape the encasement at the most vulnerable point – the zipper closure.

1  
Pull zipper towards Zip-N-Click™.

2  
Place zipper pull over holding post.  
Zipper is pushed into opening.

3  
Close the Zip-N-Click™ until it **CLICKS**.  
When you hear it click, you know it's locked!

# Box Spring Backer

The Sleep Hygiene Experts™

## The CleanRest® Commitment

Cleanliness | Comfort | Protection

## Why do you need to install a CleanRest® box spring/foundation encasement?

Like mattresses and pillows, box springs/foundations can become infested with harmful microtoxins and dust mites and their fecal waste over a period of time. Bed bugs also look for empty, dark areas to hide in during the day that are in close proximity to the human blood meal that they consume at night. Box springs/foundations provide the perfect hideout for bed bugs. The only way to properly protect you and your family is to install a CleanRest® encasement. CleanRest® is the world's most trusted and technically advanced sleep and bedding protection product line featuring patented MicronOne® fabric technology.

# Pillow Backer

The Sleep Hygiene Experts™

## The CleanRest® Commitment

Cleanliness | Comfort | Protection

## Why do you need to install a CleanRest® pillow encasement?

Installing a CleanRest® pillow encasement on all your existing and/or new pillows will protect you and your family from harmful allergens and microtoxins such as dust mites and their fecal waste, mold spores, and pet dander so they will be kept away from your face and the air you breathe while you sleep. CleanRest® encasements also protect against bed bug infestations and are designed for maximum breathability, softness, comfort, and durability. CleanRest® is the world's most trusted and technically advanced sleep and bedding protection product line featuring patented MicronOne® fabric technology.
