PACIFIC COAST FEATHER COMPANY

SINCE 1884™

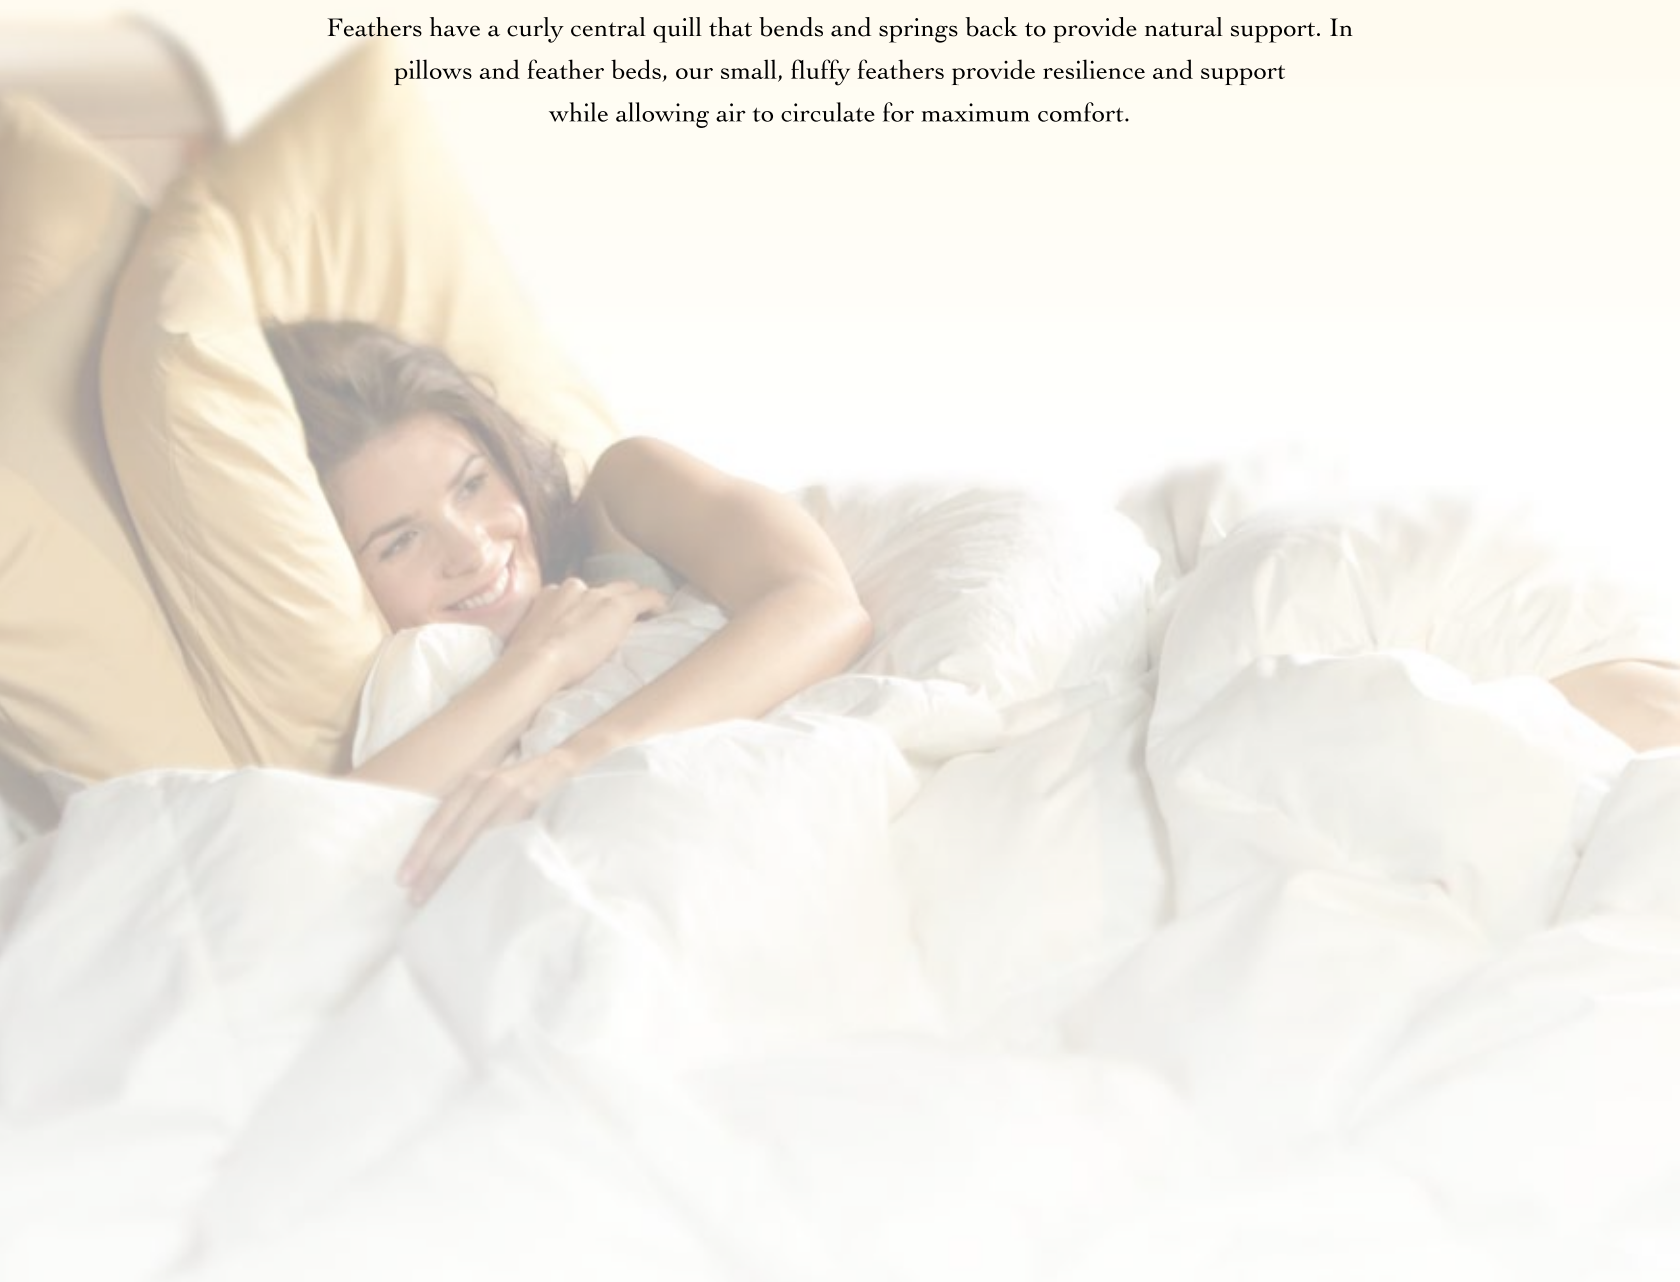

## Why Choose Pacific Coast® Natural Bedding?

**It's the Natural Choice.** Down and feathers have been used for centuries in bedding because they provide perfect comfort and support. Natural bedding is the bedding standard for many of the largest and most recognized hotel brands in the world.

Down is nature's fluffiest and lightest weight insulator. Each puff is a small cluster of filaments that expands to trap air, keeping the sleep environment cool in the summer and warm in the winter. In other words, keeping you comfortable year-round.

Feathers have a curly central quill that bends and springs back to provide natural support. In pillows and feather beds, our small, fluffy feathers provide resilience and support while allowing air to circulate for maximum comfort.

## Hallmark Features

**Pacific Coast® Down and Feathers** are carefully selected and sorted so only the very fluffiest and highest quality are used. 525 fill power is considered medium warmth/high loft for a comfortable sleeping environment, suitable for all climates. Poorer quality (lower fill power) down will not re-loft or perform well over time.

**Hyperclean® Down and Feathers** are produced with our unique cleaning method, which means dust, dirt and allergens have been removed so your guests can rest easy.

**100% Cotton Barrier Weave™** fabrics use a tighter weave and special finishing so down and feathers won't sneak out.

**Double-needle** sewing/closing method produces ultra durable products that withstand the rigors of the hospitality industry.

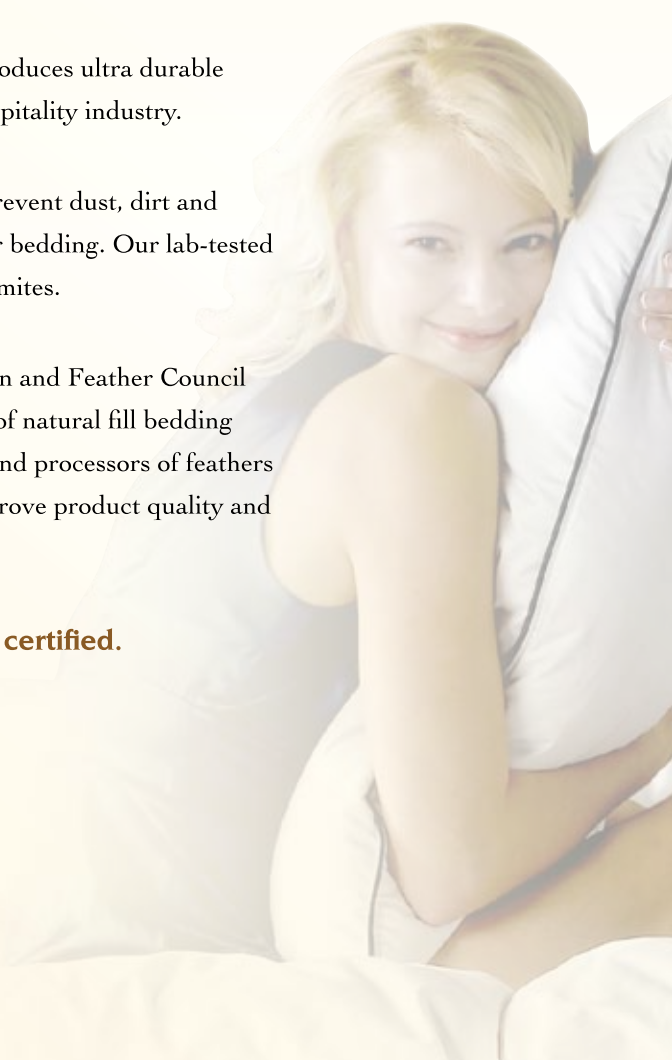

**AllerRest Fabric®** is specially woven to prevent dust, dirt and harmful allergens from penetrating into your bedding. Our lab-tested allergen barrier is also proven to block dust mites.

**ADFC Certification** - The American Down and Feather Council (ADFC) is an association of manufacturers of natural fill bedding products, as well as dealers, buyers, sellers and processors of feathers and down. Their goal is to maintain and improve product quality and labeling accuracy.

**All Pacific Coast® products are ADFC certified.**

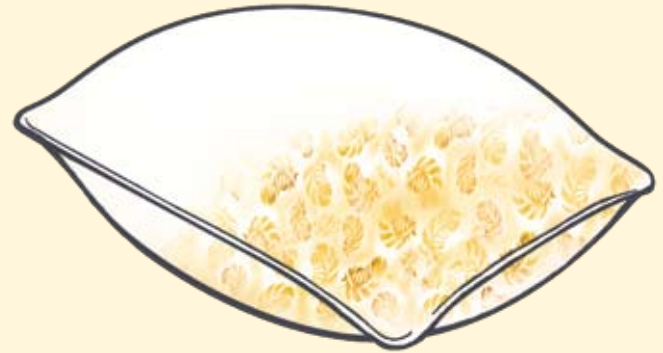

# Natural Fill Pillows

**Pacific Coast® Feather Pillow** Filled with resilient feathers for lasting support.

- Hyperclean® Pacific Coast® feathers
- 230 thread count 100% cotton Barrier Weave™ fabric

## Why Choose Restful Nights® Synthetic Bedding?

**Unsurpassed quality and comfort at an exceptional value.** At Pacific Coast Feather Company, we maintain rigorous quality standards across our entire product portfolio, including our synthetic line of basic bedding. Adhering to these tough standards, our Restful Nights® Synthetic Bedding line has been designed, tested and engineered specifically to withstand long-term use in the Hospitality environment.

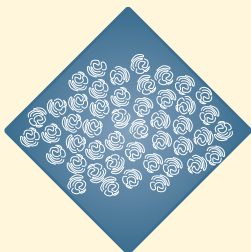

### Restful Nights® Synthetic Fills

#### High Loft Fills

These garneted fibers (a combing process that entangles the fibers) deliver springy and resilient loft.

- Durafill® is our value priced garneted fiber. It is mechanically crimped for enhanced loft.
- Ultima™ is our premium, spiral spun (conjugate) polyester fiber that delivers resilient loft with a silky smooth touch.
- Invista™ S-18 Antimicrobial Fiber is our best spiral spun polyester fill. It features the maximum amount of slickener for an ultra silky feel. It delivers superior wash/dry recovery and is anti-microbial. A Pacific Coast Feather Company exclusive!

#### Down-like Fills

These fibers that are blown into the ticking are not entangled like garneted fibers. This process allows them to flow freely within the tick.

The result is a down-like feel that is adjustable and more resistant to matting and clumping.

- Ultraflow™ is our value priced cluster fiber. It is higher denier (thickness of fiber) and larger in cluster size.
- Trillium™ is a micro-denier, highly slickened, short fiber that has an incredibly silky, almost fluid feel. A Pacific Coast Feather Company exclusive!
- Conformance® Supreme is a low denier, highly slickened cluster fiber (fiber spun into the shape of a ball) providing significant loft, while maintaining an adjustable, down-like feel.
- Invista™ Comforel® is specially engineered fiber puffs providing superior loft.

#### Continuous Filament

These continuous filament fibers are made with a highly specialized process that takes one continuous, extremely long strand of fiber and laps it back and forth into a batt. The result is a very durable product that will not clump, mat or shift.

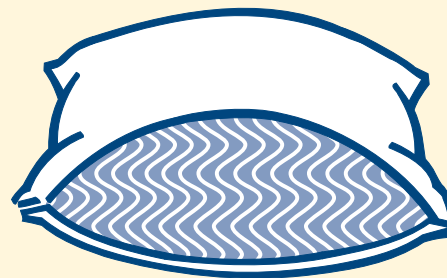

- DuraLux™ is an ultra-premium fiber that delivers a luxurious feel with incredible durability.

# Synthetic Pillows

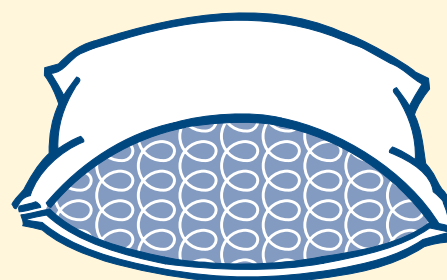

**Restful Nights® FlexiLoft® Pillow** Features Durafill® fiber fill with a white 55/45 polyester cotton cover and is finished with a “serge and turn” edge. Available in Green, Gold and Platinum labels representing medium, firm and extra firm support.

NATURAL LIVING®

## *What is Ingeo™ Fiber?*

**Ingeo™ Fibers are ingenious, environmentally friendly materials made from plants, not oil**

Ingeo is made from a breakthrough process that...

- starts with naturally wholesome, annually renewable raw materials (e.g. corn)
- does not use harsh chemicals or solvents
- reduces greenhouse gas generation by over 90%
- uses over 70% less fossil energy than traditional materials

Ingeo often outperforms like products made from polyester because it provides...

- durable, yet comfortable, lasting loft
- superior insulation
- excellent wicking properties
- naturally low odor retention

**Natural Living® products contain 50% Ingeo™ fibers offering premium performance and reduced environmental impact.**
